River Herring Volunteer Counting Records

River: **Year:**

Location: **Data Manager:**

                                                      Data Audit: (Y/N)

Date	Start Time	End Time	Herring Count	Water Temp. (C)	Counter ID	Notes

2005 Note: This is a draft template with just the essential data columns. You can modify the table to include data that you may want to record on your field data log (such as air temp. or cloud cover). We encourage you to customize a field data log to suit your group. Our goal is to transcribe field logs into a common database that all counting groups use.
